

Refractory products / insulation, silica-alumina base in parts for use in all types of aluminum casting alloys, primary aluminum production plants and aluminum smelters and semi-finished products.

We produce:

Floats, Floating, Peaks, Nozzles, Couplings, Nipples
plugs, distribution boxes / feeders

Canales, plates, filter housings, micro-porous ceramics degassed,

Sheaths for temperature measurement in metal bath

Rotors, Studs for pistons, ceramic Cement

Sealing putty ceramics, painting ceramics, vertical casting lubricant.

Download Spec Sheets:

- * CETERM Ceramic Product Line
- * Overview CETERM
- Key Features * Physical Techniques
- * Feeder Canal and Boxes
- * Ceramic Plates
- * Permeable Ceramics for Refractory metal degassing
- * Ceramics Thermocouple Sheaths
- * Ceramic Crucibles
- * PC-50 Ceramic Painting
- Ceramic Cement CC-50
- * Ceramic Sealing Putty
- * Lubricant for Coladas L-50
- * Chemical Composition and Chemical Properties.
